Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

# Office Action Summary

**Application No.**

10/574,845

**Applicant(s)**

BRUCKERHOFF, KLEMENS

**Examiner**

STEVEN R. GARLAND

**Art Unit**

2121

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 18 September 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-5 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SI/22)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_
- Paper No(s)/Mail Date \_\_\_\_\_

### DETAILED ACTION

1. Claims 1-5 are pending.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lizotte et al. 2006/0026880.

Lizotte et al. 2006/0026880 teaches a method of producing a stamping tool to stamp safety elements on surfaces of a carrier element. (numbered paragraph 0040,0064) Lizotte also teaches the use of digital three dimensional data (0057, depth of material or volume removed), transferring the data to the stamping tool by laser beams in a single step (fig. 4), use of a combination of data for security (fig. 12, 0049, 0058,0062, 0095, 0103). Lizotte also teaches that the method can be applied to various applications or objects such as badges, production of anti-counterfeiting markings, etc. (0095,0101, 0109, 0119). See the abstract; figures; numbered paragraphs 0010, 0040, 0052-0058, 0060, 0062, 0064, 0066, 0085, 0095, 0101, 0103, 0109, 0110, 0119.

Lizotte teaches both the use of multiple laser beams and the use three dimensional data as noted above, but does not specifically show their combination.

It would have been obvious to one of ordinary skill in the art to modify Lizotte to use multiple laser beams to transfer the 3 dimensional data to the stamp for rapid stamp production.

In response to applicant's arguments, Lizotte in fig. 12 clearly shows computer generation (122) of the three dimensional template (hologram). Also note the various numbered paragraphs above. Further Lizotte can scale the information so that it fits a desired area such as a cartridge or other item such as badges (figs. 5,6, 0095,0101, 0109, 0119), forming a stamping tool (fig. 4), etc.

Further the instant specification provides little guidance as to what is actually considered a three dimensional digitized template in numbered paragraph in the abstract and 0013.

4. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lizotte et al. 2006/0026880 as applied to claims 1-3 above, and further in view of Betti et al. 2004/0242392.

Lizotte et al. 2006/0026880 teaches a method of producing a stamping tool to stamp safety elements on surfaces of a carrier element. (numbered paragraph 0040,0064) Lizotte also teaches the use of digital three dimensional data (0057, depth of material or volume removed), transferring the data to the stamping tool by laser beams in a single step (fig. 4), use of a combination of data for security (fig. 12, 0049, 0058,0062, 0095, 0103). Lizotte also teaches that the method can be applied to various applications or objects such as badges, production of anti-counterfeiting markings, etc. (0095,0101, 0109, 0119). See the abstract; figures; numbered paragraphs 0010, 0040, 0052-0058, 0060, 0062, 0064, 0066, 0085, 0095, 0101, 0103, 0109, 0110, 0119.

Lizotte teaches both the use of multiple laser beams and the use three dimensional data as noted above, but does not specifically show their combination.

It would have been obvious to one of ordinary skill in the art to modify Lizotte to use multiple laser beams to transfer the 3 dimensional data to the stamp for rapid stamp production.

Lizotte teaches that the method can be applied various objects used to stamp an object as noted above but fails to specifically show applying it to a cylinder or pair of drums.

Betti et al. 2004/0242392 teaches laser engraving of a cylinder or two cylinders (drums) for embossing a web material. numbered paragraph 0010.

It would have been obvious to one of ordinary skill in the art to modify Lizotte in view of Betti and apply the method to a web like material. This would allow ease in detecting counterfeit material and also identifying the source of the material.

In response to applicant's arguments, the seamless transfer appears to be related to the digital processing and laser processing (instant specification 0015) and as noted above Lizotte also teaches digital processing and laser processing.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEVEN R. GARLAND whose telephone number is (571)272-3741. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on 571-272-3819. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
